

## CLIENT EXPERIENCE

### Assess a strategic project architecture and SDLC

Our client was experiencing controversial results in one of its strategic projects: error that were not detected during testing, unsatisfactory performance, an accumulation of change requests, fuzzy functional scope.

To put the project back on track we established a two stage plan: an organizational evaluation of the project and a technical evaluation of the solution.

The technical evaluation of the solution mainly focused on the software architecture review, coding best practices alignment, review of the quality metrics and adoption of agile development best practices to improve their SDLC.

## WHAT

### Main sectors of Activity

- Banking & Insurance
- Consumer Goods
- Public Sector
- Industry
- Technology, telecommunications
- Health
- Services

### Your Challenges

- Security
- Big Data
- Cloud Computing
- Information Mobility

### Our practices

- IT Organisation & Service Management
- Portfolio & Project Management
- Architecture & Development
- Enterprise Testing
