

CLIENT EXPERIENCE

Putting a strategic project back on track

Our client was experiencing controversial results in one of its strategic projects: errors that were not detected during testing, unsatisfactory performance, an accumulation of change requests, fuzzy functional scope. To put the project back on track we established a two stage plan: an organizational evaluation of the project and a technical evaluation of the solution, coaching of the project lead and testing, the restructuring in order to establish a perennial project organization and solution.

WHAT

Main sectors of Activity

- Banking & Insurance
- Consumer Goods
- Public Sector
- Industry
- Technology, telecommunications
- Health
- Services

Your Challenges

- Security
- Big Data
- Cloud Computing
- Information Mobility
